ALLEEGRO® CONTAINER TREES

THE BRAND FOR MODERN GROWTH

OUR CONTAINER TREES ARE HEALTHIER, MORE ROBUST AND LOWER MAINTENANCE THAN CONVENTIONAL TREES. THE REASON FOR THIS IS THE INNOVATIVE ALLEEGRO® PROCESS.

ALLEEGRO® Soil

The porous ALLEEGRO® growing soil has a high water retention capacity and excellent water permeability. The air content and proportion of coarse pores promote root respiration at extreme locations with little air, for example on streets with a lot of traffic. The low proportion of silting materials, such as clay, prevent soil slurry. Both dry and wet periods are therefore easily withstood. The ALLEEGRO® soil meets all of the requirements of the current guidelines.

The targeted selection of young plants

Young trees are selected for our trees in accordance with Clasen & Co's strict quality requirements.

Regular precision pruning

In order to guarantee an even, strong crown without thick branches, the crown and terminal shoots on ALLEEGRO® trees are trimmed several times during the cultivation period.

Optimum nutrient supply

ALLEEGRO® trees receive an optimum nutrient supply and are therefore able to develop outstandingly. An independent test has shown that ALLEEGRO® trees establish themselves better than bare-root trees and other ordinary container plants.

The unique range

We offer a range of more than 60,000 container trees of 25 species and more than 75 varieties.

For full information about the ALLEEGRO® container trees and the cultivation technology, please visit: www.clasen-co.com/en/container-trees

OUR INNOVATION

BENEFIT FROM THE ADVANTAGES OF OUR PRODUCTION TECHNOLOGY! IN COMPARISON WITH OTHER BREEDING SYSTEMS, ALLEEGRO® TREES ESTABLISH THEMSELVES EVEN IN EXTREME LOCATIONS AND IRRESPECTIVE OF THE TIME OF YEAR. THIS FREES YOU UP TO DEAL WITH THE REST OF YOUR PROJECT.

ALLEEGRO® experience reduced stress during growth

ALLEEGRO® trees do not have to be dug up! All the fine roots are therefore preserved when replanting. This vastly reduces the amount of maintenance work subsequently required.

ALLEEGRO® trees establish themselves optimally

The density of the ALLEEGRO® soil minimises grain breakage. The roots therefore grow smoothly into the surrounding soil and penetrate the ground evenly. The plants have excellent stability.

ALLEEGRO® trees are highly robust

The optimum supply of nutrients makes our ALLEEGRO® trees healthy and particularly resilient. The ALLEEGRO® soil is easy to moisten, enabling the trees to overcome dry periods without any stress. The container prevents the soil from quickly drying out at the construction site and makes watering the trees easier.

ALLEEGRO® trees are easier to transport

The volume weight of ALLEEGRO® soil is 40% lower than that of root balls. The special lifting device also makes transportation easier.

ALLEEGRO® trees are easy to plant

At the time of delivery, the root balls are completely intact. Simply remove the pot from the root balls, cut the sides of the container ball several times, place root balls in the tree pit and you're done.

ALLEEGRO® trees make you independent

Clasen & Co container trees can also be planted during the vegetation period. They establish themselves well even in extreme locations.

ALLEEGRO® trees are also financially worthwhile

With ALLEEGRO®, you will receive extremely high-quality trees at competitive prices and can save time, effort and therefore money due to extremely low failure rates and simple handling.

The full range of ALLEEGRO® container trees can also be found in our webshop: www.clasen-co.com/shop

THE MODERN NURSERY

WE WANT TO FIND THE RIGHT ANSWERS TO THE CONSTANTLY CHANGING ECONOMIC AND CLIMATE-RELATED REQUIREMENTS IN THE GARDENING AND LANDSCAPING SECTOR AND TO DEVELOP SUITABLE SOLUTIONS FOR OUR CUSTOMERS.

Our idea

We are driven by the idea of a modern nursery! The idea of combining the experience that we have gradually gained over generations with the latest technologies and innovative, contemporary concepts, and of continually expanding upon it.

We want to come up with new ideas based on the concepts of care, responsibility and reliability and to hold tight to tried-and-tested ones.

Our commitment

We produce and market plants that meet high quality standards and grow reliably.

To achieve this, our team is exclusively made up of specialists who know how to skilfully meet the high requirements with regard to our products and services.

Our commercial credo is to treat our customers, partners and employees with care, solidarity and fairness.

The benefits for you

- We can provide you with all your plants from a single source. This reduces your logistical workload and saves you time.
- Our cultivation, procurement and logistics network enables us to offer rapid and solid solutions for your projects.
- Strict checks prior to delivery ensure uncompromising quality.
- Our broad range of container plants is unique and enables successful planting regardless of the time of year and location.
- We support your projects by providing comprehensive customer service, advice and assistance – from the creation of the quotation to the point of delivery.
- Our flexibility and extensive experience enable you to obtain practical and reliable solutions for even the most unusual requirements.
